### Language

- English
- Germany

### Education

#### BOKU University

Environment and Bio-Resources Management  
Bachelor of Science  
2018-2022

### Stack

- React
- Nextjs
- Nodejs
- Expressjs
- MongoDB

### Skills Summary

- JavaScript (ES6+): Advanced knowledge of modern JavaScript standards for building dynamic and interactive web applications.
- React.js: Experienced in developing modular, reusable, and performance-driven UI components.
- State Management (Redux): Skilled in managing complex application state efficiently with Redux.
- Node.js & Express.js: Hands-on experience in building scalable backend services, RESTful APIs, and server-side logic.
- MongoDB & Mongoose: Strong expertise in designing, modeling, and managing NoSQL databases with Mongoose for efficient data handling.
- Fullstack Development: Capable of delivering end-to-end solutions, from designing intuitive frontends to developing robust backends and database architectures.

### Experience

#### Web developer - Internship at Abhyaz Company December 2022 - April 2023

- Web Developer at Abhyaz Company for 4 months, where I gained experience in web development and programming, honing my technical skills.

### Projects

- Developed multiple websites as part of courses and for real clients, showcasing my ability to implement web solutions and create user-friendly interfaces.

### Projects
